

# NORTH AMERICA TRAFFIC™

THE LEADER IN TRAFFIC CONTROL SYSTEMS

**The SAFE choice for Traffic Control**

## **Directional Antenna System**

North America Traffic's Directional Antenna enables increased communication reliability in areas or setups where the standard omni-directional antenna is not suitable.

# NORTH AMERICA TRAFFIC™

THE LEADER IN TRAFFIC CONTROL SYSTEMS

## Directional Antenna System

Unlike the omni-directional antenna - which transmits in a 360 degree spread pattern - a directional antenna transmits a focused beam, in the direction in which the antenna is aimed.

The operational distance is 2-7 miles (with line-of-sight) depending on the model.

The directional antenna can be fitted to all North America Traffic's control trailers that have been manufactured since 2014, that employ the quad plane antenna base station.
